PROJECTS

WEATHER CHECKER

- It is an Node and express based web application.
- It checks the current weather of the specified city.
- I have designed the backend with express and EJS is used as a template engine for Front end.
- I have used OpenWeatherMap API to fetch the data for the application.

COVID MAP DISPLAY

- It is an React based Web application .
- In this a map is shown and markers are shown where Covid cases are high at that time in country .
- I have Designed the front end part using React.
- I have used the government provided API and for maps display I have used OpenStreet Map.

MYBRARY

- It is Node express Mongodb based web application.
- In this user can add books and author and display them .
- I have designed the front end with EJS and backend with express and node and for Database Mongodb is used.

Complete 2021 Web Development BootCamp

- In this Udemy course i have learnt WEB development.I have made many mini scaled projects like:
- Todo List (https://github.com/ashwani2/Checkedlist)
- RESTful API from Scratch (https://github.com/ashwani2/RESTAPI)
- Keeper App (https://github.com/ashwani2/keeperApp)
- Rest projects you can check on my profile (https://github.com/ashwani2)

CERTIFICATIONS

- MongoDB basics from Mongodb University website in 2022.
- Web Devlopment BootCamp from Udemy in 2021.
